

# Nagasaki Symposium on Emerging Viral Diseases

13:30-13:40

*Opening Remarks*

13:40-14:40

*Dr. Heinz Feldmann*

Laboratory of Virology, Rocky Mountain Laboratories, Division of Intramural Research, National Institute of Allergy and Infectious Diseases, NIH

*"Biocontainment Level 4 (BSL4):  
The Role in Research and Public Health"*

14:40-14:55

*Discussion*

14:55-15:10

*Tea Break*

15:10-15:50

*Dr. Ayato Takada*

Division of Global Epidemiology  
Research Center for Zoonosis Control, Hokkaido University

*"Ebola and Marburg viruses"*

15:50-16:30

*Dr. Masayuki Saijo*

Department of Virology 1, National Institute of Infectious Diseases

*"Preparedness for highly pathogenic emerging virus  
infections in the NIID, Tokyo, Japan: from the basic  
research to the public health"*

16:30-16:40

*Tea Break*

16:40-17:20

*Dr. Kentaro Yoshii*

Laboratory of Public Health,  
Department of Environmental Veterinary Sciences  
Graduate School of Veterinary Medicine, Hokkaido University

*"Infection of highly pathogenic tick-borne flaviviruses"*

17:20-18:00

*Dr. Jiro Yasuda*

Department of Emerging Infectious Diseases,  
Institute of Tropical Medicine, Nagasaki University

*"Antiviral strategies against hemorrhagic fever viruses"*

This symposium is supported by The Global COE Program, Nagasaki University  
Integrated Global Control Strategy for the Tropical and Emerging Infectious Diseases.
