

Quality Universal Health Coverage & Resilience:

Technical Workshop

25-26 February 2016, WHO Kobe Centre

I.H.D. Centre Building, 9th Floor, 1-5-1 Wakinohama-Kaigandori Chuo-ku, Kobe 651-0073, Japan

Workshop Objectives:

- 1) Collate perspectives from experts with experience in EVD-affected West African countries on the linkages between early recovery, resilience and quality UHC.
- 2) Collate perspectives from Japanese experts on the linkages between early recovery, resilience and quality UHC and lessons from Japanese experiences.
- 3) Develop consensus within the workshop on the linkages between early recovery, resilience and quality UHC (and co-develop a synthesis document outlining how the links can be further developed to improve health systems/service delivery in the future).
- 4) Co-develop key suggested recommendations and actions informed by the collective wisdom of the workshop participants.

Expected participants

In order to have the deep discussion in this 2-day workshop, this meeting will bring together a small group of participants with rich knowledge and experiences in quality, UHC, early recovery and health service resilience. Representatives from Ebola affected countries, Japanese ministries & governmental agencies, and experts from Japanese institutions will be expected participants.
